\* 1) ROC bundled services include providing both organic program and ROC program certification concurrently.

2) ROC stand-alone service means that the CB can provide the ROC program as an individual program certification based on current organic program certification by a different certifier recognized by the ROA. In such cases, the ROC operator would be “dual-certified” in a sense, i.e., organic program + ROC program.

Applicants are strongly advised to inquire with CB Program Managers regarding auditor availability in specific regions.

CBs in pending status are not eligible to accept ROC applications.
