* 1) ROC bundled services include providing both organic program and ROC program certification concurrently.

2) ROC stand-alone service means that the CB can provide the ROC program as an individual program certification based on current organic program certification by a different certifier recognized by the ROA. In such cases, the ROC operator would be "dual-certified" in a sense, i.e., organic program + ROC program.

Applicants are strongly advised to inquire with CB ROC Program Managers regarding auditor availability in specific regions.

CBs in pending status are not eligible to accept ROC applications.

Farm like the world depends on it.
