
Brand Supply Chain Actor (SCA) Disclosure Form

All brands must disclose their supply chain actors that are handling products that are Regenerative Organic Certified®. Brands are responsible to ensure that all the actors within the supply chain for Regenerative Organic Certified® products meet program requirements. An agreement or memorandum should be in place between the supply chain actor(s) and the brand that describes the business relationship related to Regenerative Organic Certified products.

This form is to be completed by each supply chain actor that is part of a brand's supply chain for Regenerative Organic Certified claims on products. **Brands are responsible for collecting supply chain actor information and including these documents in their online application annually.**

The form must be completed by a legally authorized representative of each supply chain actor organization. By completing this form, the representative acknowledges that it has received, has read, fully understands, and agrees to be bound by the terms of the Regenerative Organic Certified program and further agrees to comply with the Regenerative Organic Certified Framework (Standards) and criteria set forth in the Governing Documents located at <https://regenorganic.org/resources>.

Licensing with the ROA does not denote being Regenerative Organic Certified by ROA. Brands that license with the ROA shall NOT represent themselves as certified by the ROA. By licensing with the ROA, a brand may make Regenerative Organic Certified claims only on products that come from a Regenerative Organic Certified farm operation and handled by supply chain actors handling Regenerative Organic Certified products.

Submit completed form with online Brand Licensing Application.

SECTION 1

1. Name of Affiliated Brand
