

Native®

Products from nature

COLORLESS

CLEAR AND EXEMPT
OF IMPURITIES

ETHICAL SOURCING

From cane fields and organic industrial processes, we produce vegetable alcohol that can be applied, for example, in the cosmetic and pharmaceutical sector. The use of organic alcohol in the composition of these products incorporates a production chain, marked by the preservation of biodiversity, respect for the environment and promotion of social actions. By replacing the conventional product with an organic product, the company can obtain branding and product attributes gains in its final product.

Native is the first food company in the world to receive the ethical sourcing system certification granted by **UEBT (Union for Ethical BioTrade)** - an international non-profit association that established a global standard for the sustainable use of biodiversity in the production chain

We are pioneers in regenerating nature

Native is the 1st food company in Brazil to receive **ROC certification - Regenerative Organic Certified™** - for its contribution and experience with Regenerative Organic Agriculture. The certification authenticates companies that effectively contribute to soil regeneration, valuing animal welfare and the dignity of rural workers. Producing sustainably while regenerating the environment for future generations is part of our commitment to nature.

PHYSICAL AND CHEMICAL CHARACTERISTICS

Review	Unit	Acceptance Level
Alcohol Content	°GL	Mín. 96,1
Alcohol Content	°INPM	Mín. 94,0
Specific mass at 20°C	kg/m ³	Máx. 807,1
Acidity (in acetic acid)	mg/L	Máx. 10
PH	-	5,5 - 7,5
Conductivity 25°C	µS/m	<100
Permanganate time test at 15°C	minutos	Mín. 30
Acetaldehyde	mg/L	Máx. 10
Acetone	mg/L	Máx. 2,5
Methyl alcohol	mg/L	Máx. 25
Acetal	mg/L	Máx. 5
Ethyl Acetate	mg/L	Máx. 5
Higher alcohols (total)	mg/L	Máx. 5
